

ScriptingEngine::NewState

CCharacter::Update

CCharacter::Move

```
graph LR; A[ScriptingEngine::NewState] --> C[CCharacter::Move]; B[CCharacter::Update] --> C;
```

The diagram illustrates a flow where two different functions, 'ScriptingEngine::NewState' and 'CCharacter::Update', both point to a single target function, 'CCharacter::Move'. The arrows are blue and originate from the right side of the first two boxes, converging on the left side of the third box. The third box is shaded gray, while the others are white with black borders.
